TARGET AUDIENCE - Practicing Anesthesiologists

OBJECTIVES

Curtis L. Baysinger, MD – Nitrous Oxide Analgesia for Labor: Should We Make the Effort?

1. Describe the pharmacokinetics and dynamics of inhaled nitrous oxide when used for labor analgesia
2. Appreciate that pain relief is one of several desired outcomes for women in labor
3. Describe the administrative concerns when nitrous oxide is used for labor analgesia

Richard P. Dutton, MD – Quality in Anesthesiology and MACRA Today

1. Identify the importance of a quality program for improving patient outcomes
2. Adopt relevant improvement activities for their own anesthesia practice
3. Plan regulatory reporting compliance consistent with their current state of quality improvement activity

Robert Gaiser, MD – Hot Topics in Obstetric Anesthesia in 2018

1. Design effective plan for labor
2. Appropriately manage anesthesia complications
3. Incorporate current literature into anesthesia plan

Erica Lin, MD –

Anesthetic neurotoxicity in infants and children: harm or hype?

1. Review the pre-clinical evidence, observational studies, and most recent clinical trial on anesthetic neurotoxicity in the pediatric population.

Congenital heart disease: not just for kids anymore

2. Define medical issues encountered with ACHD patients and anesthetic implications.
